

VINCOMM SIGNS RESELLER AGREEMENT WITH NATIONAL FTTH PROVIDER

FOR IMMEDIATE RELEASE

SAN DIEGO, AUG 22, 2007 (BUSINESS WIRE)—Vinculum Communications, Inc., (Vincomm), a leading provider of Voice over Internet Protocol (VoIP), delivering reliable, cost-effective, integrated voice and data services to small and medium businesses, announced today the signing of a reseller agreement with Digital Streets to deliver private label VoIP services to their FTTH (Fiber to the Home) master planned communities throughout North America,

Palm Desert, Calif.-based Homelink Communications, Inc. DBA (“Digital Streets”), is one of the largest privately held Fiber-to-the-Home (FTTH) communications providers in the United States, designs and installs advanced FTTH networks in master planned residential communities in the United States. To date, Digital Streets has connected five FTTH projects with more than 3,500 customers and is actively designing and constructing 21 additional projects that represent over 250,000 homes in Calif. alone.

This announcement comes on the heels of Digital Streets signing an asset acquisition agreement with Connexion the largest privately held FTTH infrastructure provider in the US. Per the deal described by Digital Streets president Scott Musgrave, “Digital Streets is ,

With Vincomm acting as the underlying VoIP provider for these residential networks. Scalable from a few thousand residential or enterprise seats to millions of customers around the world, GlobalTouch’s globally-recognized, award-winning hosted VoIP platform lets organizations enter and operate in any size market. Available on a white label basis, GlobalTouch’s platform lets carriers, cable telephony providers (MSOs), resellers, PTTs, ISPs and marketing companies to launch a private-labeled VoIP business in 60 days or less.

In a press release, Gregory O. Welch, CEO of GlobalTouch Telecom pointed out that, the worldwide VoIP market swelled by 34 million new subscriptions in 2006, according to market research firm In-Stat (News - Alert).

“As ‘wired’ communities continue to sprout across the country, such as those developed by Greenfield, it’s no surprise that domestic consumers continue to embrace VoIP and its many benefits,” Welch said in the release. “What is truly important to note, is that as an industry, we are barely scratching the surface in regard to consumer market penetration. By 2011, In-Stat predicts the consumer VoIP market will total nearly \$44 billion worldwide. Recognized as the ‘Gold Standard’ in VoIP service, we look forward to working with innovators such as Greenfield, and to achieving our shared goal of spreading quality digital voice and video to individuals worldwide.”

Mike Powers, CEO, Greenfield Communications, said GlobalTouch’s VoIP platform “gives providers the ideal combination of rich features and the low CAPEX/OPEX (News - Alert) of a hosted ASP approach.”

“Providers in the VoIP space are looking to minimize costs while still delivering a top

notch service and growing market share,” he said. “The combination of GlobalTouch’s core technology and the Greenfield Communications market approach is a perfect way to accomplish these goals.”

GlobalTouch made news on TMCnet last week when it announced that it had selected Endeavor to provide installation of VoIP services as a part of the company's end-to-end packaged service offering. The alliance will enable GlobalTouch carrier, service provider and MSO customers to purchase turnkey hosted VoIP PBX solutions, which include private label field installation services delivered by Endeavor.
